PROFILE

Born in 1997, since I have been 12 years old I have got a deep interest in digital and all it's shades.

Today I am 20 years old, and I am working with micro and macro game realities, which makes me able to grow my skills. Gaming, design, development; I interact by projects for customers, companies or important brands, with a 360 degree view ensuring the required quality.

EMPLOYMENT HISTORY

• FREELANCE

samuelesciacca.com
MAY 2012 - Present

Since I was 14 years old, I've noticed my love about the digital world. The fast learning quality made me able to work in this field in the same time I've decided to do it.

I have made more than ten Internet sites and logos that have enabled my customers to increase their web qualities and contacts.

During years I've gained the knowledge that let me to know how to realize graphics, video games, websites and logos.

• CONTRIBUTOR - GAMEPIX

Via Belluno, 1 - ROMA
DEC 2014 - Present

After the publication of my first videogame for the italian publisher Gamepax on December of 2014, now with 7 videogames online i reach more than 2 millions of users all over the world.

I love videogames as a form of entertainment and I believe with gamification it is an excellent way to transform boring and passive activities into active activities, helping people and companies.
